- Section B: answer one question.
- The maximum mark for this examination paper is [46 marks].

2 pages

[8]

[22]

Section A

Answer **all** questions in this section. Marks will be awarded for focused answers demonstrating accurate knowledge and understanding of research.

Biological level of analysis

 Explain how one principle that defines the biological level of analysis has been demonstrated in one example of research (theory or study).
[8]

Cognitive level of analysis

2. With reference to **one** study, describe how **one** biological factor may affect **one** cognitive process.

Sociocultural level of analysis

With reference to one study, outline the role of situational and/or dispositional factors in explaining behaviour. [8]

Section B

Answer **one** question in this section. Marks will be awarded for demonstration of knowledge and understanding (which requires the use of relevant psychological research), evidence of critical thinking (for example, application, analysis, synthesis, evaluation), and organization of answers.

- 4. Discuss one or more effects of the environment on one or more physiological processes. [22]
- 5. Discuss **one or more** ethical considerations related to **one or more** research studies at the cognitive level of analysis. [22]
- 6. Examine two or more factors influencing conformity.
